

National Regulations Austria

Eligible Participants and Target Groups:

This EMIDA Joint Call addresses all Austrian researchers from universities and non-university research organisations, as well as institutions of agricultural research, industry, national or regional bodies, and all others, which carry out cooperative research in the field of emerging and major infectious diseases of production animals.

The project consortium has to include **at least one Austrian participant**. The minimum number for an EMIDA project consortium is at least one participant from three different EMIDA-countries.

Project financing will be realized via *Virtual Common Pot*. Exact available budget not yet determined.

Eligible costs are costs which are necessary for carrying out the approved project proposed, insofar as their amount is appropriate. In addition, all expenses or costs attributable to the project which are incurred directly, actually and in addition (to the established operating expenses) for the duration of the funded research activity, are eligible costs.

Non-eligible costs are costs that are not directly connected with the funded project and costs that are not considered as eligible costs due to EU competition law regulations.

Start date of the project can be fixed **retroactively** (a date prior to the signature of the grant agreement) at the request of the consortium, but at their own risk in case the application or the subsequent contract negotiations fail.

Generally, the **terms and conditions** for the Austrian participants follow the generic Terms and Condition of Contract (“Allgemeine Vertragsbedingungen AVB”) of the Austrian Federal Ministry of Health (Bundesministerium für Gesundheit / BMG), available in German language at the Austrian EMIDA national contact point.
